The Energy Manager / Surveyor will be based ideally close to the Manchester area, but be willing to travel Nationwide for site visits. A critical element of their "behind-the-meter" offering is improving energy efficiency in both new and existing client buildings. Reporting to the Technical Solutions Manager, the successful candidate will work to audit, identify, manage and reduce on-site energy usage and expenditure. Utilising internal and 3rd party technology, data, reporting and auditing, along with the validation of all efficiency improvements delivered. The Energy Manager will also work closely with their data scientist and Technical Director to deploy and develop innovative and cutting edge hardware and software solutions to identify and deploy energy savings. They are seeking a highly organised, dedicated, and dependable individual with a strong passion for energy efficiency. The ideal candidate should be a self-starter with critical thinking and analytical abilities able to bring knowledge and experience to the role. This is a newly established position that offers considerable independence to shape the role and provides exposure to senior management and various business functions. Energy Manager Position Overview Conduct energy surveys and assessments in industrial facilities to identify large, inefficient assets and processes. Collect and analyse energy usage data and identify energy wastage and areas for improvement. Identify and evaluate cost-effective measures to improve building energy efficiency. Develop internal energy-saving reports, including cost plans, calculations of energy savings and payback periods. Communicate with clients to discuss findings and recommendations. Stay up-to-date with the latest energy-efficient technologies and practices in the industrial sector. Work in collaboration with the Technical Solutions Manager and sales team to prospect and propose client energy solutions projects. Energy Manager Position Requirements Ability to understand complex processes, draw concrete conclusions, and make and enact sound recommendations based on acceptable energy payback. Sound engineering knowledge of energy-intensive mechanical and electrical equipment, with proven work experience in these areas, such as: compressed air, chilled water, motors & drives, boilers etc Strong understanding of HVAC systems, Building Management Systems (BMS) and/or PLCs. With experience of interrogating BMS to extract key information and knowledge of BMS optimisation. Expertise in optimising existing, or implementing new, sub-metering, and practical knowledge of AM&T systems. On-site auditing and problem-solving experience. The position entails significant travel within the United Kingdom. 5 years + specific Energy Management experience. Bachelor's degree in a relevant subject, such as Mechanical or Electrical Engineering. Energy Manager Position Remuneration £45,000 - £50,000 DOE Car Allowance Hybrid role Company & performance bonus (3-12% of salary) Annual salary reviews (roughly 2% increase) 25 days holiday + bank holidays (chance to buy or sell up to 5 days) Bupa Medical Insurance (Choice to opt out and receive £20 a month instead) All training required for development paid for Pension contribution Full package discussed at interview stage Bennett & Game Recruitment are acting as a Recruitment Agency in relation to this vacancy. Bennett and Game Recruitment are a multi-disciplined technical recruitment agency based in Chichester, West Sussex operating across the UK with specialist teams covering a range of industries. We are acting as a Recruitment Agency in relation to this vacancy, and in accordance with GDPR by applying you are granting us consent to process your data, and contact you in relation to this application and the services we offer.	

Renewable Energy Consultants — Rise Technical Recruitment Ltd in Crawley, West Sussex (North East) (Feb 2023 - Apr 2023)

bJunior Sales Consultant - Renewables

Job Title: Renewable Energy Consultants

Junior Sales Consultant

- Renewables Posted 8 hours ago by

Location:

Crawley, West Sussex Salary/Rate:

25,000

- 35,000/annum Bonus + Training + Progression Junior Sales Consultant
- Renewables Crawley 25'000
- 35'000 DOE + Bonus + Training + Progression Opportunities + Excellent Benefits Do you have a background in sales and a passion for renewable energy?

Are you looking to join a dynamic and well-established renewable business offering fantastic training, scope to progress your career and the chance to contribute to a greener future? This industry leading company specialise in the design, installation and maintenance of renewable energy systems for domestic and commercial projects, including Heat Pumps, Solar PV, Battery Storage. They have gone from strength to strength in recent years and have built a strong reputation through their bespoke solutions that they offer their clients, and now wish to expand their sales team to drive future success. In this role, the main focus is on domestic and commercial sales for air source and ground source heat pump projects. The successful candidate will work with Senior Sales Consultants responding to inbound enquiries for heat pump projects and building relationships with company directors, main contractors, consultants and architects to develop future sales opportunities. The ideal candidate will have some sales experience, but more importantly a passion for renewable energy and a keen desire to get into the sector. Knowledge of renewable systems is advantageous, but not essential as training will be provided. This is an excellent opportunity to break into the consistently evolving renewable energy sector with an impressive company where you can develop your technical knowledge, increase earnings through bonus and build a long-term career.

The Role:

- Primary focus on ground source and air source heat pump project sales into domestic and commercial markets
- Respond to inbound enquiries, progressing into led generation in the future
- Build and maintain relationships with business owners / directors, main contractors, architects etc. to generate future sales opportunities
- Site visits to survey property and consult with clients
- Office based, options to work from home in the future

Director of Onshore Renewables Description Be the energy behind change. Join ABL Group. ABL Group is a leading global independent energy and marine consultant working in energy and oceans to de-risk and drive the energy transition across the renewables, maritime, and oil and gas sectors, offering the deepest pool of expertise across marine and engineering disciplines in more than 300 locations globally. At ABL, we are more than just technical consultants - our global teams of experts are passionate about creating a sustainable world. Working with us will allow you to work in a dynamic environment, on various exciting renewable energy projects, with top-quality people on unique projects and be part of an exciting journey of rapid growth. The Senior Consultant is a critical and global role for ABL with its various interests in renewables. This candidate will be a vital member of the delivery teams and take increasing responsibility within the business, perhaps by leading a market segment or service line. This role will support one of the onshore renewables technology lines (Onshore Wind, Solar, Energy Storage) and will have a primary connection to one technology but will support all teams as required.

What you will be doing:

The successful candidate will manage various renewables projects and support the positioning of ABL Group as the global renewables advisor of choice. The incumbent will work within teams of multi-disciplined project managers, engineers, analysts, and specialists, developing and working with our global capability. The successful candidate will share a collective responsibility for meeting our ambitious business growth objective to double our renewables activity by 2025. The successful candidate will report to the Head of Technology (Onshore Wind, Solar, Energy Storage) but, will operate autonomously. Responsibilities include, but are not limited to : Working as part of either the Onshore Wind, Solar or Energy Storage teams. Delivering projects [GW1] to a high standard, to ensure the utmost satisfaction of our clients and an outstanding quality of deliverables, including: due diligence for lenders, investors, vendors, etc. Supporting developers and owners through design, procurement and construction phases. And services such as energy yield assessment, performance analysis, etc. Leading proposal writing, supporting business development activities and representing ABL. Managing the project's key performance

indicators including budgets. Managing project teams to ensure optimal delivery of projects. Support the positive development of our people through mentoring, training, etc. Develop ABL's suite of renewables products to lead in new markets and new (associated) technologies, building new systems through R D to give ABL a competitive advantage. Collaborate with, support and evolve with other businesses, teams and staff in the ABL Group, networking at all levels within the company, as well as with external bodies and acting as a representative of ABL at industry conferences, seminars, events, etc. Ensuring projects operate by ABL's high health, safety and environmental policies and procedures to guarantee the safety and well-being of staff, sub-contractors and any other third parties who may be impacted by our work. Ensure project work and technical quality standards are maintained through QA/QC processes, and with a commitment to driving continuous improvement internally. This role will be based in London/Brighton or one of our overseas offices, candidate must have the right to live and work in the country of application, Local and international travel may be required. Hours are flexible (subject to the above) but a minimum of 40 hours per week. No recruiters or agencies will be considered unless pre-authorised; direct applications only. What we are looking for. The successful candidate will demonstrate the following qualifications and experience: Minimum of 5 years of experience and passion for onshore wind, solar or energy storage. Qualified to at least Bachelor's or Master's degree level in Engineering or a relevant discipline. A successful track record of project management and managing multi-disciplinary teams. Functional knowledge of how renewable projects are developed, constructed and operated. A practical understanding of the economics of renewable energy projects, and the mechanisms by which they are financed. Strong technical knowledge including players, markets, technology, warranties, etc. Key characteristics include strong interpersonal skills, self-awareness, attention to detail, length of character, pragmatism and flexibility. Working knowledge of MS Office is mandatory. Excellent communication, report writing skills and oral/written English. Additionally, the following would be favourable: Multi-cultural and language experiences and capabilities. Experience working in a consulting environment / with client management responsibility. Experience with relevant software (PVsyst, WindPro, WindFarmer, etc.). Experience as Independent Engineer and/or Owner's Engineer. Experience acting as a team leader. Experience on other sides of a project (developer, owner, financier, etc.). Hold Chartered Engineer status, or be working towards it. What is in it for you? ABL ensures that every employee has the opportunity to learn and progress quickly - we have implemented a system to ensure that everyone could achieve swift on-the-job learning. The successful candidate will work with our globally based dynamic teams. We offer ample opportunities to the right candidates to grow in their role. We offer a competitive benefits package, and a flexible, exciting, and supportive working environment. The successful candidate will join the regional management team and share responsibility for meeting our ambitious growth objectives in the rapidly growing renewables business. Our team members and colleagues worldwide will support you to be part of the exciting movement in the dynamic wind industry. You can learn more about our team and what we do here: <https://abl-group.com/> Join us and grow with us. We will be conducting interviews continuously and reserve the right to take down the advert when we have found the right candidate. Please note that for your application to be taken into consideration, you must submit your application, either via LinkedIn or using the form on our Career pages .
